

## Links from Energy Envoys materials

Some Energy Envoys webpages and materials include hyperlinks to other websites that are not owned or controlled by the National Energy Foundation (NEF). This includes embedded videos from external websites. These links are included for a number of reasons, including:

- for further relevant information or other key source material
- for background information
- for useful practical information

We select links that are relevant to the content they are linking from and are suitable for the likely audience. The inclusion of a link to an external website should not be understood to be an endorsement of that website or the site's owners (or their products/services, where relevant). NEF has no control over any suggested videos promoted through videos embedded in Energy Envoys webpages. The content of suggested videos has not been reviewed, approved or endorsed by NEF and NEF is not responsible for the accuracy or relevance of suggested videos.

External links are selected and reviewed when the page is published. However, NEF is not responsible for the content of external websites. This is because:

- NEF does not produce them or maintain/update them
- NEF cannot change them
- they can be changed without NEF's knowledge or agreement

NEF encourages you to be aware when you view external material, when you leave Energy Envoys webpages or materials and to read the terms and conditions and privacy policy of relevant third party websites.
